

نمون برگ ۱: شناسنامه اثر

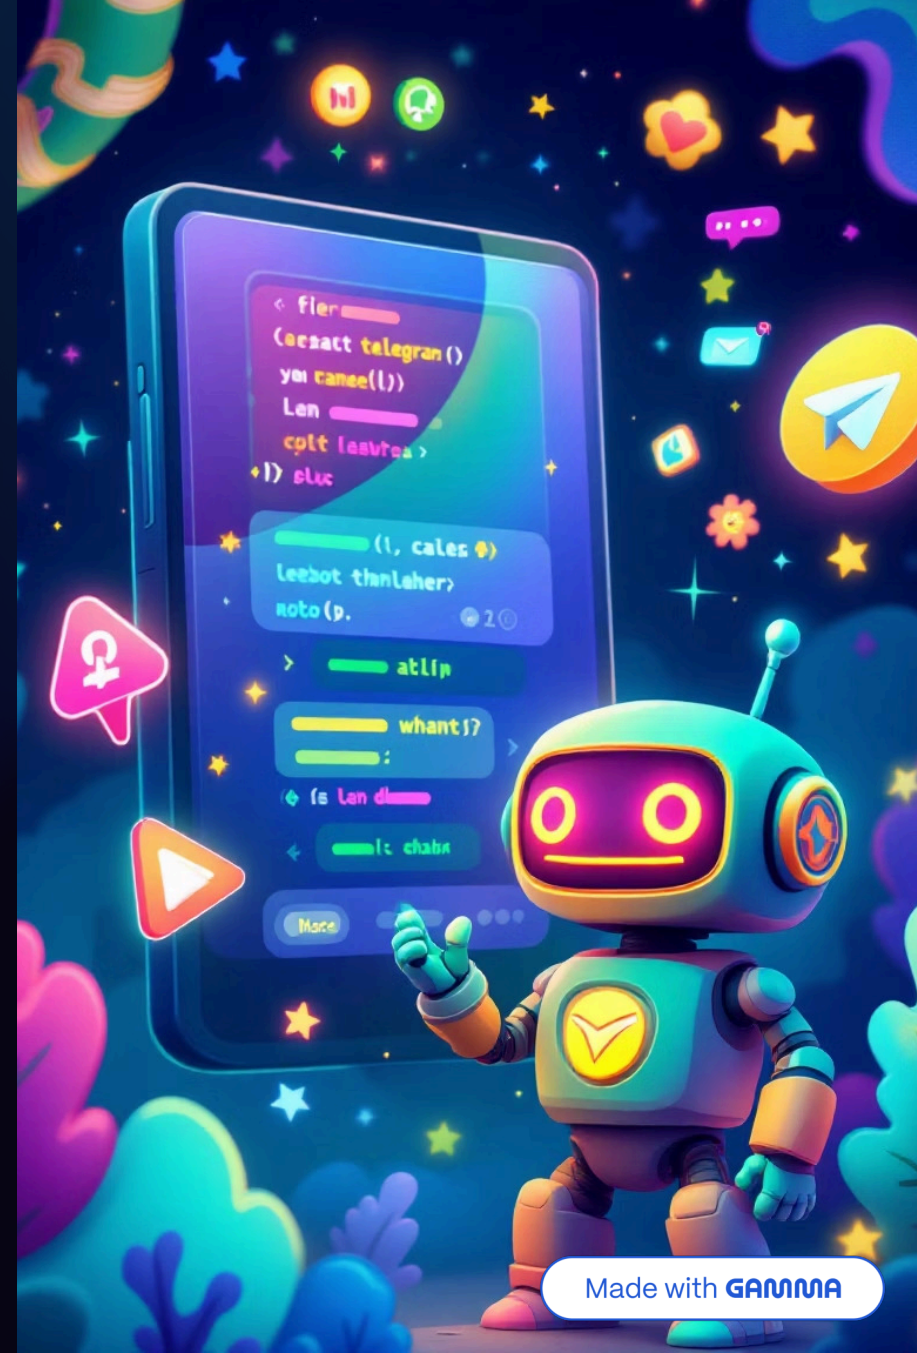

مسابقه: جشنواره خوارزمی		عنوان اثر: رباعیات سازه تلگرافی	
کد ثبت اثر در سامانه: ۱۹۳۸۶۵۱		استان: البرز	
شهرستان: کرج		نام مدرسه/کد مدرسه: شهید صدوقی	
ناحیه/منطقه: ۳		یزوهشسرای دانش آموزی: خوارزمی	
تلفن مدرسه یا پیش شماره:		نام و نام خانوادگی: امیرعلی رودین حسن	
تلفن همراه/ثابت: ۰۹۶۲۱۴۱۹۰۸		کد ملی: ۴۳۱۲۱۸۵۷۴۳	
نام تیم: ۱×۱۸۷		پایه: ۱۲	
رشته تحصیلی: شبکه و نرم افزار		سمت: سرگروه	
عضو: ۰۹۶۲۱۴۱۶۰۸		کد ملی: ۰۳۱۳۵۷۶۷۸۵	
عضو:		پایه: ۱۲	

اهداف	ارائه پروژه برای جشنواره خوارزمی
ویژگی های برجسته اثر (حداقل ۳ مورد)	صفت رباعیات برای کاربرد بدون سپاس نریز به دانش کد نویسی
توضیحات ۱	کد نویسی با پایتون
توضیحات ۲	استفاده از شیئی گرامر
توضیحات ۳	رباعیات سازه برای کسب و کار و استفاده شخصی
کلمات کلیدی (۸ تا ۱۵ کلمه)	رباعیات تلگرافی - کد نویسی - رباعیات سازه - مبانی شیئی گرامر
مشخصات استاد راهنما/تلفن همراه	۱- علی انصاری - ۰۹۳۹۳۶۱۸۷۹۹ ۲- استاد لقیان کدنی - ۰۹۱۶۳۹۰۴۱۵۹

نام و نام خانوادگی: امیرعلی رودین حسن	نام و نام خانوادگی: مدیر واحد آموزشی مجری	نام و نام خانوادگی: استاد راهنما
تاریخ و امضا: ۱۴۰۴/۲/۲۹	شماره تلفن، تاریخ و امضا	تاریخ و امضا
شماره تلفن، تاریخ و امضا	شماره تلفن، تاریخ و امضا	شماره تلفن، تاریخ و امضا

The ✨ ixi & salar Telegram Bot Maker ✨: Your Bot-Building Dream!

Ever dreamt of creating your very own Telegram bot but felt intimidated by complex coding? 😞 Well, say hello to the ixi & salar Telegram Bot Maker! 🎉 This incredible Python project, developed especially for the Khwarizmi Festival in Iran, is here to turn your bot-making dreams into a dazzling reality. It's designed to be super simple, yet incredibly powerful!

🎨 The User Experience: Beauty in the Terminal! 🖥️

"A terminal interface? Won't that be a boring black screen? 😬" Absolutely NOT! We've taken the humble terminal and transformed it into a stunning, user-friendly canvas! 🖼️ Think gorgeous, well-structured tables, vibrant emojis bringing every option to life, and meticulously centered items that make everything look just right. ✨ Navigating our UI feels like a breeze, not a chore! Isn't it surprising how beautiful a command-line interface can truly be? 😊

Bot Features You Can Build: Unleash Your Creativity!

With ixi & salar, you're not just building a basic bot; you're crafting a masterpiece! 🎨 You'll find over 10 main bot options, each branching into multiple choices, giving you ultimate control.

Command Control

Easily define your bot's /start and /help messages, or add any new custom commands you can imagine! How cool is it to personalize your bot's first impression? 🙌

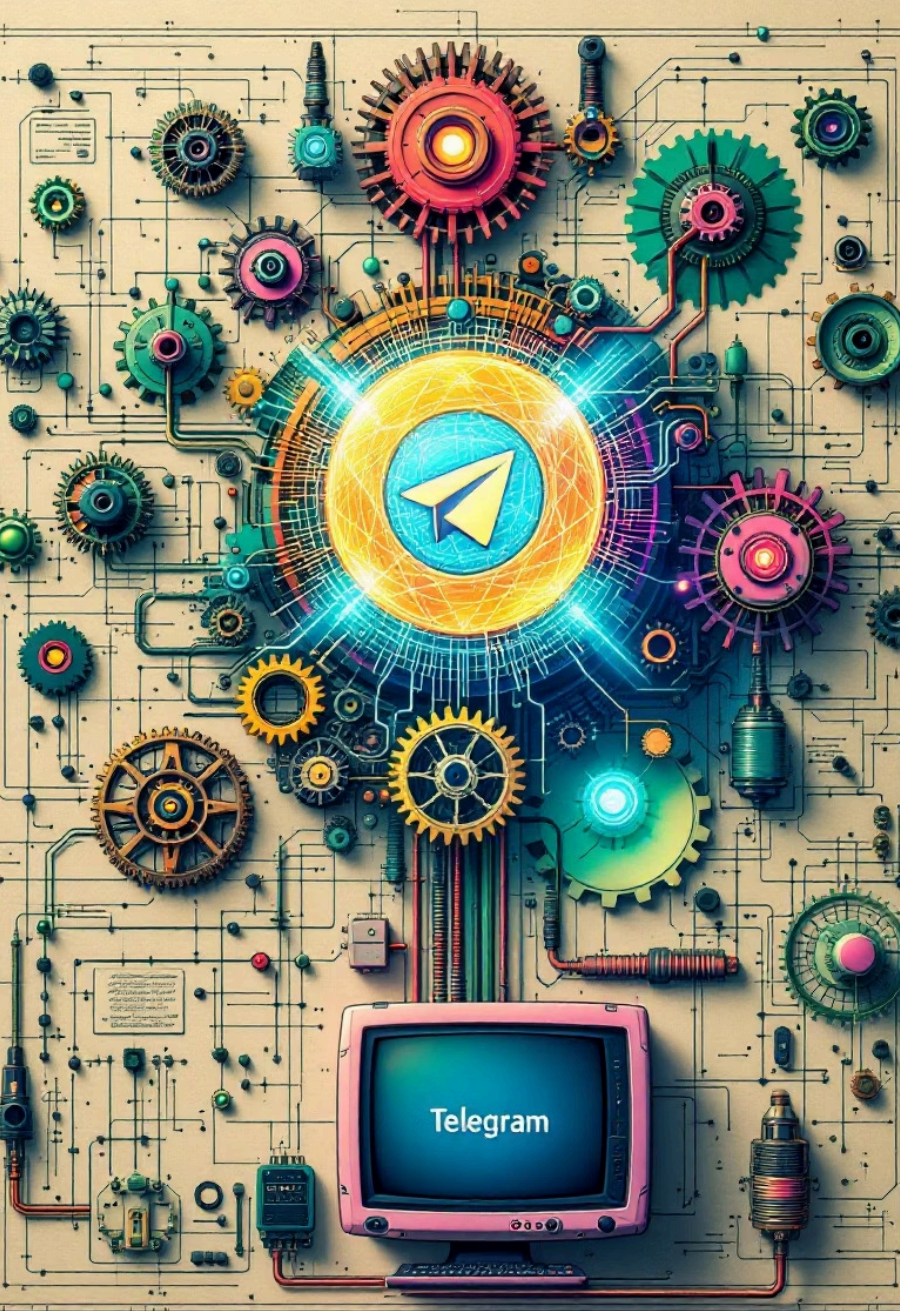

Smart Conversations (Sessions!)

This is a HUGE one! 🤖 Our powerful session management feature lets you create complex, multi-step conversational flows. Think surveys, interactive quizzes, or guided processes. Can you imagine the dynamic interactions you'll be able to design? 🔄

Interactive Buttons & Templates

Want to add clickable buttons to your messages? Done! ✅ Plus, we've included awesome pre-made templates like a full-fledged E-commerce bot 🛒 or a handy To-Do list manager. For the E-commerce template, you can even import your product data directly from Excel or CSV files! 📊 Isn't it a game-changer to have a ready-to-go online store bot in minutes? 📺

The Brains Behind the Bot: OOP & AI Power!

Beneath that beautiful interface lies some serious engineering! 

Object-Oriented Perfection (OOP) & AI Insights

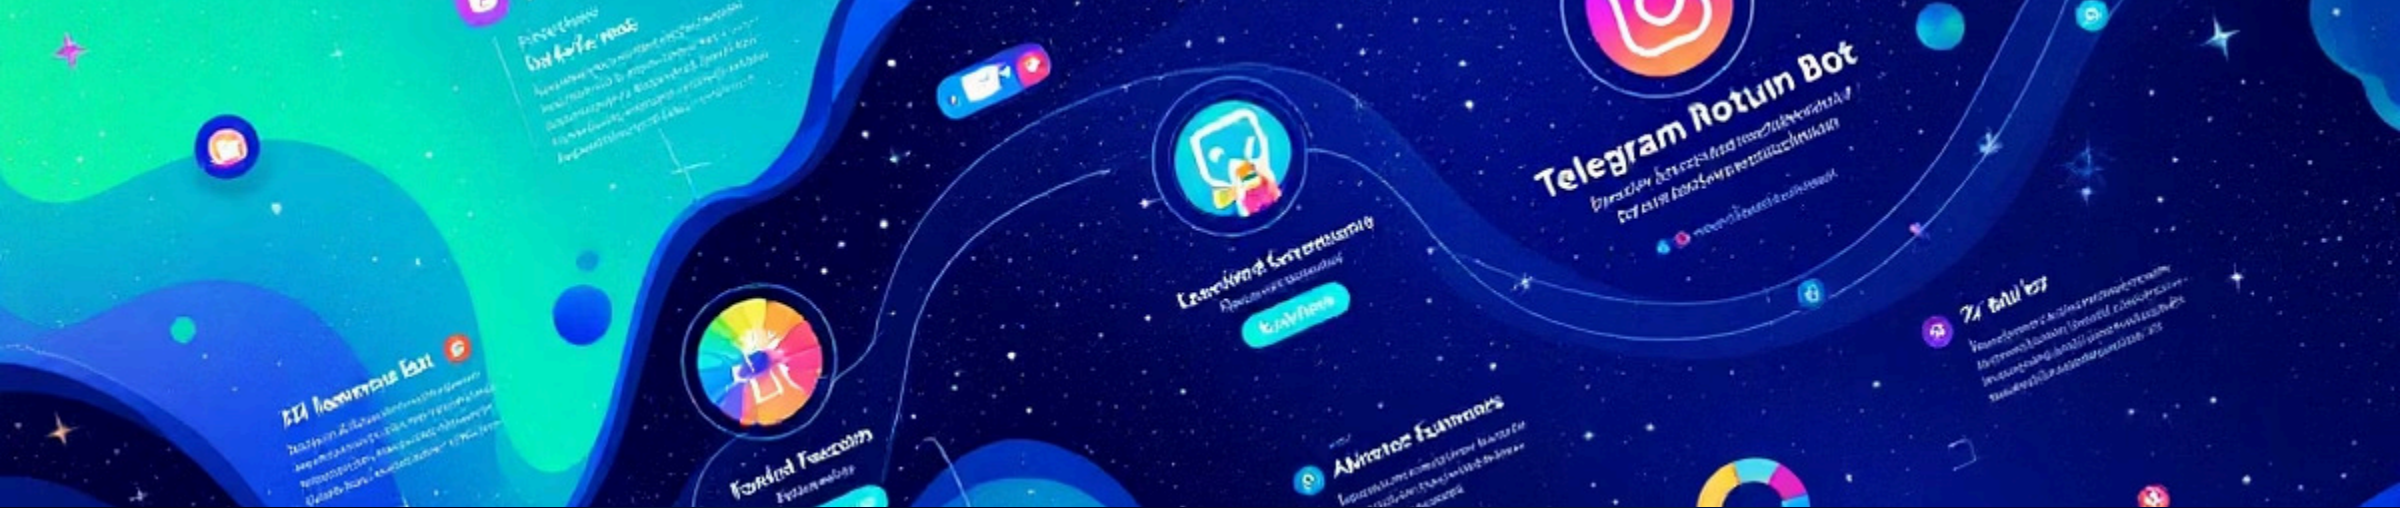

Object-Oriented Perfection (OOP)

We've meticulously applied Object-Oriented Programming (OOP) principles, especially for our bot code generator. This means that even though our generator produces thousands of lines of Python code, it's always clean, structured, and easy to understand. Isn't it remarkable to get such high-quality, readable source code automatically?

AI Insights

Here's where it gets truly futuristic! We've integrated Artificial Intelligence into the project. This AI can summarize and analyze your generated bot's source code for you! Get a quick overview, understand its structure, and gain insights without diving deep into every single line. How valuable is it to have an AI assistant explaining your own code?

🌟 Future Horizons: What's Next? 🚀 ✨

The ixi & salar Telegram Bot Maker is a living, breathing project! We're committed to continuous improvement and adding even more incredible features. Our immediate next step is to add functional capabilities to buttons. This means buttons won't just send text; they'll be able to trigger specific actions and intricate logic within your bot! ⚡ Can you envision the next level of interactivity this will unlock?

Meet the Masterminds! ✨

This truly innovative project is the brilliant creation of:

- Amirabbas Rouintan (ixi_flower)
- Salary Poor Rezaiyan

They've made bot creation not just accessible, but genuinely fun and powerful! 🎉
